

Amendments to the Specification:

Please replace the paragraph beginning at page 8, line 30 with the following amended paragraph.

A probe 74 shown in FIG. 7c is similar to the probe 71 shown in Fig. 7b except that an auxiliary probe 75 is disposed below a main probe 76. The auxiliary and main probes ~~[[75]]~~ 76 and 75 are attached to each other. At one end of the main probe 76 is formed a tip part 76c. Consequently, the probe 74 of FIG. 7c is symmetrical to the probe 71 of FIG. 7b.
